

5.Prevention of Suicide of the mother of the crèche child:-*It is with much struggle we could save the mother of our Creche Child Sanchana. There was a big fight in the family with husband, mother-in-law and Sanchana's Mother. Since our Creche teachers had close contact with the mother she came and informed us. She wanted to end up her life by taking poison because the husband and mother in law were abusing her for becoming pregnant, because they did not want have the second child. The Creche teacher brought the mother to our convent, We gave her protection that night and on the following day we went along with the mother and convinced the mother-in-law and the husband about value of life. We gave them much awareness of living in peace, love, forgiveness and unity in the family. Though initially the husband and mother-law were not receptive, after putting out all their grievances and asking pardon with each other they made peace with each other. Within a month she gave birth to a lovely baby boy. Now the family is living in peace and happiness.*
