

6. Supply of Food-grains to crèche Children's Families: - Providing Food ingredients for the families of crèche children during the Covid-19 lock down period: As we are in pandemic covid-19, we started locked down from the 10th of March onwards. Since these children are poor and their parents do not have the job, we provide food ingredients to their houses. Some parents of these children told us over the phone, that the children are asking them to take to the crèches because they were having good food and time there. Though we feel sorry for these children we could only supply food materials to them and talk to parents during this difficult time of lock down and since the lockdown continues and the corona cases are increasing day by day.
