

7. Creation of “We feeling” in the community:- *The parents of our crèche children have a strong “We feeling that they are one in the community. The mothers say that earlier they were not at all minding or talking to each other. It is only due to the awareness talk they received in the crèches transformed them as positive persons. During the Celebration of Christmas, Deepavali and women’s’ day by coming forward with joy and working together has enabled them to cultivate this good habit. Now they also understand and help each other during their troubles, also if they have to go to government office to request some common facilities for their slums they work united which is really a good point.*

8.Care Given for Teenagers;- *The slum women were happy when we contacted their teenagers to have some good leadership training programs at our crèche building during their school holidays. They were taught about developing leadership qualities, good traits and habits, along with some study skills. This training was very participatory with good interactions and moral games which the children enjoyed as well as grasped the message imparted to them. Parents were much happy about their performance in their houses as well as in their studies after attending these programe and requested us to continue it during the next year also.*
